

APPENDIX

Changes to Claims:

Claims 9-14 are added.

The following is a marked-up version of the amended claim:

1. (Amended) A rotary electric machine mounted on a vehicle, comprising:
 - a stator including a stator core and an armature coil that is wound around the stator core and has a coil end protruding from the stator core in an axial direction;
 - a rotor arranged opposite to the stator core;
 - a housing supporting the stator and the rotor; and
 - a stator coolant passage means ~~provided on an outer peripheral surface of the stator core~~ radially inside of the housing and radially outside of the stator core, the stator coolant passage means having a damping member and a stator coolant tube defining a stator coolant passage for flowing coolant therethrough, the damping member having a part disposed radially outside the stator coolant passage.
